

Job Posting: Exploration Geologist

Location: Port Hardy, BC

We are seeking an Exploration Geologist to join our team reporting to the Project Geologist. This role will be focused on core logging and supporting multi-rig drill programs in a porphyry copper-gold district. The Exploration Geologist will ensure accurate and consistent geological data capture while mentoring junior staff and supporting the broader technical team. The ideal candidate thrives in remote environments, and brings a safety-first mindset while excelling in collaborative team settings with experience collecting extensive, varied geological and geotechnical datasets.

What You'll Do

- Conduct detailed core logging (lithology, alteration, mineralization, structure) with a focus on epithermal and porphyry copper-gold systems.
- Oversee drillhole data capture and sampling workflows to ensure consistency and quality.
- Implement and monitor QA/QC protocols, including insertion of standards, blanks, and duplicates.
- Work closely with drill contractors to ensure efficient and safe drill site operations.
- Support surface field programs such as geological mapping, soil and rock sampling, and prospecting traverses.
- Assist in developing and refining geological models by contributing detailed interpretations of observation-based datasets
- Mentor and train junior geologists in logging and sampling protocols.
- Prepare daily/weekly logging summaries, and contribute to presentations for internal reviews.
- Ensure adherence to company safety policies and contribute to a strong safety culture at drill sites and core facilities.

Qualifications

- B.Sc. in Geology or Earth Science; M.Sc. an asset.
- 3–5 years of mineral exploration experience, with direct core logging experience in porphyry copper or similar systems highly regarded.
- Strong technical skills in geological logging, alteration/mineral identification, and applied geochemical/SWIR workflows.
- Experience with QA/QC programs and data management best practices.
- Proficiency in geological software (Leapfrog Geo, MX Deposit) and GIS platforms (ArcGIS/QGIS).
- Strong organizational, reporting, and communication skills.
- Ability to work in rugged terrain and remote camps.
- Valid BC Driver's License (or ability to obtain).
- Registration, or eligibility for registration, as a Professional Geoscientist (P.Geo.) is an asset.

About us

Northisle Copper & Gold is a BC-based mineral exploration company with a principal mineral asset in the north Vancouver Island region. The North Island Project is a development stage copper-gold porphyry district-scale project with four confirmed deposits and several mineralized occurrences that are being actively explored in parallel to project development. The expansive and highly prospective mineral tenure covers 35km of the North Island porphyry belt.

We recognize that excellence is realized best when diverse perspectives and strengths are contributed towards shared goals. We are committed to building a diverse workforce and inclusive workplace. We welcome applications from members of racialized minorities, women, Indigenous Peoples, persons with disabilities, persons of various sexual orientations and gender identities, and those who engage productively within diverse workplaces.

To apply or learn more, please send your resume and a brief cover letter to hr@northisle.ca We thank all interested applicants for submitting their resume, however, only those selected for an interview will be contacted.
