

Job Posting: Project Geologist

Location: Port Hardy, BC

We are seeking a Project Geologist to join our team, reporting directly to the Exploration Manager. This role is central to the execution of our exploration programs across a world-class porphyry copper-gold district. The Project Geologist will support and manage drill programs with multiple rigs, lead field programs with multiple crews and contractors, and play a key role in advancing our technical understanding of the property's prospects and deposits. The ideal candidate thrives in remote environments, and brings a safety-first mindset while excelling in collaborative team settings.

What You'll Do

- Support and/or manage multi-rig drill programs, including drill planning, supervision, QA/QC, and contractor coordination.
- Supervise core logging teams, ensuring consistent and high-quality data capture in porphyry environments.
- Coordinate and support field programs including geological mapping, geophysics, soil/stream sediment sampling, and prospecting.
- Collaborate and contribute to deposit and district-scale geological models (lithology, structure, alteration, mineralization).
- Analyze and interpret varied datasets to generate and prioritize exploration targets.
- Ensure best-practice standards for data collection, management, and QA/QC are implemented and maintained.
- Provide technical coaching and mentorship for junior geologists and field staff.
- Prepare and deliver technical reports, presentations, figures and updates for Exploration Manager and Vice President Exploration

Qualifications

- B.Sc. in Geology or Earth Science
- 5+ years of mineral exploration experience, with porphyry copper-gold and epithermal system exposure strongly preferred. Some of the industry experience can be substituted with additional graduate studies, alternate complimentary work or research.
- Demonstrated experience or exposure to drill programs (preferably multi-rig).
- Strong technical skills in core logging, alteration/mineral system interpretation, and 3D geological modeling.
- Familiarity with BC exploration permitting and regulatory requirements, or comparable requirements from other jurisdictions, is desirable
- Proficiency in geological software (Leapfrog Geo, MX Deposit) and GIS platforms (ArcGIS/QGIS) is highly regarded.
- Strong data management, reporting, and communication skills.
- Ability to work in rugged field conditions and supervise crews in remote settings.
- Valid BC Driver's License (or ability to obtain).
- Registration, or eligibility for registration, as a Professional Geoscientist (P.Geo.) is highly regarded.

About us

Northisle Copper & Gold is a BC-based mineral exploration company with a principal mineral asset in the north Vancouver Island region. The North Island Project is a development stage copper-gold porphyry district-scale project with four confirmed deposits and several mineralized occurrences that are being actively explored in parallel to project development. The expansive and highly prospective mineral tenure covers 35km of the North Island porphyry belt.

We recognize that excellence is realized best when diverse perspectives and strengths are contributed towards shared goals. We are committed to building a diverse workforce and inclusive workplace. We welcome applications from members of racialized minorities, women, Indigenous Peoples, persons with disabilities, persons of various sexual orientations and gender identities, and those who engage productively within diverse workplaces.

To apply or learn more, please send your resume and a brief cover letter to hr@northisle.ca We thank all interested applicants for submitting their resume, however, only those selected for an interview will be contacted.
