1. NATURE OF OPERATIONS

Northisle Copper and Gold Inc. (the "Company") is a mineral exploration company that was incorporated on August 3, 2011 in the Province of British Columbia. The Company's principal business activity is the exploration and development of its North Island Project on Vancouver Island. Its head office is located on the 15th floor – 1040 West Georgia Street, Vancouver, B.C.

These consolidated financial statements have been prepared on the basis that the Company is a going concern, which assumes that the Company will be able to realize its assets and discharge its liabilities in the normal course of business. The ability of the Company to do so is dependent on obtaining additional financing, through the issue of treasury shares and/or from loans to complete the exploration and development of its mineral property interests and to commence profitable operations. These consolidated financial statements do not reflect the adjustments or reclassifications which would be necessary if the Company were unable to continue its operations in the normal course of business.

2. BASIS OF PREPARATION

Summary of Significant Accounting Policies

The Company prepares its interim consolidated financial statements in accordance with International Financial Reporting Standards ("IFRS") applicable to the preparation of interim financial statements, as issued by the International Accounting Standards Board, including International Accounting Standard 34 – Interim Financial Reporting. These condensed interim consolidated financial statements should be read in conjunction with the Company's annual financial statements for the year ended December 31, 2016.

The accounting policies applied in these condensed interim consolidated financial statements are based on IFRS effective for the year ended December 31, 2017, as issued and outstanding on May 30, 2016, the date the Board of Directors approved these financial statements.

Accounting estimates and judgments

The preparation of these consolidated financial statements required management to make estimates, judgments and assumptions that affect the reported amounts and other disclosures in these consolidated financial statements. Estimates and the underlying assumptions are based on historical experience and various other factors that are believed to be reasonable under the circumstances, the results of which form the basis of making the judgments about carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates under different assumptions and conditions.

Estimates and the underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimate is revised if the revision affects only that period or in the period of the revision and further periods if the review affects both current and future periods.

Critical estimates are estimates and assumptions made by management that may result in material adjustments to the carrying amount of assets and liabilities within the next financial year. Critical estimates used in the preparation of these consolidated financial statements include, among others, the recoverability of accounts receivable, the impairment of carrying values of equipment and mineral property interests, the determination of realizable amounts of deferred tax assets and liabilities, and the measurement of equity instruments and share-based compensation.

Critical accounting judgments are accounting policies that have been identified as being complex or involving subjective judgments or assessments. Critical accounting judgments include the expected economic lives of and the estimated future operating results and net cash flows from equipment.

The North Island Copper Gold Property consists of three blocks of mineral claims located on northern Vancouver Island in British Columbia, Canada. The mineral claim blocks are referred to as the Hushamu claims, the Apple Bay claims, and the Rupert Block.

Should a production decision be made on the Hushamu claims, the Company is required to make a cash payment of $1,000,000 to Sirit Inc. within 60 days of the production decision. These mineral claims are also subject to a 10% net profits interest held by International Royalty Corporation.

Should a production decision be made on the Apple Bay claims, the Company is required to pay $800,000 in cash or in shares to Electra Gold Ltd. ("Electra"). The payment method is at the election of the Company. Electra maintains the right to explore the Apple Bay claims for non-metallic minerals subject to certain conditions.

Red Dog Property Acquisition

On February 11, 2015, the Company acquired an option to earn a 100% interest in the Red Dog Property, a 400 hectare property entirely enclosed within the Company's existing 100% owned North Island Copper Gold Property. The Company issued 200,000 common shares with a fair value of $6,000 to the vendor upon signing the option agreement and agreed to make payments of $60,000 between 2016 and 2018 and expend a minimum of $375,000 on the property by 2018. The vendor was also granted a net smelter return royalty of 3% of which 2% can be purchased by the Company at any time for US$2.0 million.

As of March 31, 2017 the exploration expenditures on the Red Dog Property have exceeded the minimum amount required to be spent by 2018 ($375,000) and have made cash payments of $35,000. All that remains to earn a 100% interest in the property is a $25,000 cash payment due by January 2018.

7. MANAGEMENT OF CAPITAL

The Company's objectives when managing capital are to safeguard the Company's ability to continue as a going concern in order to pursue the exploration and development of its mineral property interests, and to maintain a flexible capital structure which optimizes the costs of capital at an acceptable risk. The Company considers its capital for this purpose to be shareholders' equity.

The Company manages the capital structure and makes adjustments to it in light of changes in economic conditions and the risk characteristics of the underlying assets. To maintain or adjust the capital structure, the Company may issue new shares or debt, acquire or dispose of assets or adjust the amount of cash and investments.

In order to facilitate the management of its capital requirements, the Company prepares annual expenditure budgets that are updated as necessary depending on various factors, including successful capital deployment and general industry conditions. The annual and updated budgets are approved by the Board of Directors.

In order to maximize ongoing development efforts, the Company does not pay out dividends.

The Company's investment policy is to invest its surplus cash in highly liquid short-term interest-bearing investments with maturities 90 days or less from the original date of acquisition, selected with regards to the expected timing of expenditures from continuing operations.

8. MANAGEMENT OF FINANCIAL RISK

The Company's financial instruments are exposed to certain risks, including currency risk, credit risk, interest rate risk, and liquidity risk. The Company does not have financial instruments subject to other price risk.

Currency risk

The Company operates within one geographic region and is not exposed to significant currency risk related to the fluctuation of foreign exchange rates.

Credit risk

Credit risk is the risk of an unexpected loss if a customer or third party to a financial instrument fails to meet its contractual obligations. The Company's cash is held through large Canadian financial institutions. The Company's receivables consist mostly of Goods and Services Tax due from the federal government of Canada. As such, the Company considers this risk to be minimal. As at March 31, 2017, none of the Company's financial instruments subject to credit risk were past due or impaired.

Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Company is exposed to interest rate risk when holding fixed rate short term deposits of varying maturities. The risk that the Company will realize a loss as a result of a decline in the fair value of the cash equivalents investments is limited because these investments are generally highly liquid securities with short-term maturities. As at March 31, 2017, the Company considers its exposure to interest rate risk to be minimal.

Liquidity risk

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they fall due. The Company manages liquidity risk through the management of its capital structure and financial leverage as outlined in Note 7.

Accounts payable and accrued liabilities and the amounts payable to related parties are due within the current operating period.

9. LOSS PER SHARE

The Company's diluted loss per share is equal to its basic loss per share. Outstanding share purchase options and warrants could potentially dilute basic earnings per share in the future but were not included in the calculation of diluted earnings per share because they are antidilutive for the three months ended March 31, 2017 and 2016.

10. EVENTS SUBSEQUENT TO MARCH 31, 2017

On May 5, 2017 the Company completed a $1,522,247 non-brokered private placement consisting of:

- $1,042,247 from a unit private placement at a price of $0.15 per unit, with each unit consisting of one common share and one-half (1/2) share purchase warrant, with each whole warrant entitling the holder to purchase an additional common share at a price of $0.20 for a period of 2 years from closing; and
- $480,000 from a flow-through share private placement at a price of $0.20 per flow-through share.
